

Collision Repair Center Best Practices

Simplify the Ordering Process with E-Commerce

Point...Click...Paint

PBECONNECTION.COM allows you to conveniently place your orders online 24 hours a day. The FinishMaster support team will take your customized product portfolio, which is based on your shop's purchase history, and create a product list or multiple lists to make ordering as simple as possible. You could have separate lists for the paint and body departments, separate lists for each cabinet or separate lists for each tech. You decide what will work best for your business. There is also an available text field on the list (Customer Item #) for you to manually add any ordering tips or information.

Lists will assist you in implementing standard operating procedures by streamlining

products used and restricting products you do not want ordered. Yes, you can restrict items with **PBECONNECTION.COM**, reducing ordering errors. Lists are easily managed once created with add/edit/delete capabilities.

You can also manage internal controls by designating who receives email confirmations of all orders placed

online – know what is being ordered and who is ordering it.

You will have the ability to look up pricing on any item. And you may view your account balance online and monitor credit returns. You can review order history and search through past orders by several criteria. In fact, you can search the entire FinishMaster product catalog.

Get Started Today!

To get started, you can create an account online by visiting <https://www.pbeconnection.com> and filling out the **New User Registration Form** or by simply contacting your FinishMaster Account Manager. Your Account Manager will work with the E-Commerce support team to get your product lists setup to meet your needs.

And if you aren't already getting your monthly statement emailed to you, be sure to tell your Account Manager that you would like to sign up for that too. Our business is making your business better!

Customized product lists make ordering easy!

Select	Item #	Item Description	Customer Item #	Quantity
